AN ENGINEERING LED APPROACH TO BUILDING SOLUTIONS

At Metal Pro Buildings, we aren't limited by the capacity of a single factory. We operate as a strategic building solutions provider, utilizing a Tier-1 network of North American manufacturing partners.

By matching your specific project requirements scale, location, and application to the right structural system, we ensure you receive a building that is perfectly engineered, not just "off-the-shelf."

STRATEGIC PARTNERSHIPS

We work with industry leaders like Pioneer Steel, Nucor, Robertson, and Behlen.

UNBIASED EXPERTISE

Our recommendations are based on your project goals, not factory quotas.

UNBIASED EXPERTISE

Every partner in our network maintains the highest Canadian and international engineering certifications.

**"We don't just deliver a building kit, we deliver a permanent asset engineered to withstand the Canadian North for Generations."
— Herbert Broderick, CEO**

QUONSET & ARCH BUILDING SYSTEMS

For projects requiring unmatched durability, simplicity, and corrosion resistance, we partner with Pioneer Steel, a Canadian leader in roll-formed arch technology. These systems are the gold standard for agricultural, workshop, and specialty storage applications.

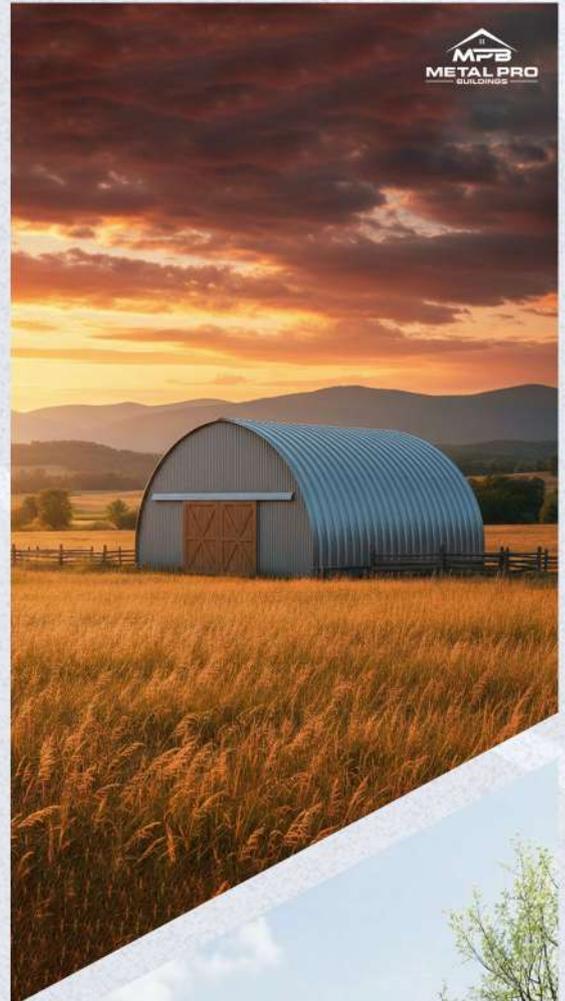

The Advantage:

Galvalume Plus™ Technology: Panels are coated with a specialized aluminum-zinc alloy and a clear, dry organic resin, providing superior protection against the Canadian elements.

50-Year Corrosion Warranty: Backed by a manufacturer's warranty against rust perforation, ensuring a lifetime of performance.

Precision Roll-Forming: Components are manufactured to microscopic tolerances, ensuring a perfect "bolt-together" fit for DIY or professional crews.

Certifications: Manufactured under CSA-A660 Quality Certification and CWB standards.

I-BEAM & PEMB SYSTEMS

For large-scale commercial, industrial, and infrastructure projects, **Metal Pro utilizes Pre-Engineered Metal Building (PEMB) and I-Beam systems** from the world's most respected manufacturers.

Engineered for Scale:

Infinite Versatility: Designed for massive clear spans (up to 300'+), heavy crane loads, and multi-story commercial applications.

Tier-1 Manufacturing: Supplied through Robertson, Nucor, and Behlen Building Systems, ensuring your project benefits from the most advanced structural steel technology in North America.

Advanced Protection:

Premium Paint Systems:

High-performance finishes with up to 40-year warranties against cracking, fading, and peeling. Weather-Tightness Warranties: Optional roof warranties (5 to 20 years) for total peace of mind in high-precipitation zones.

Target Applications: Aircraft hangars, manufacturing plants, logistics hubs, and retail centers.

FINDING YOUR PERFECT FIT

FEATURE	ARCH SYSTEMS (PIONEER)	PEMB / I-BEAM (STRATEGIC PARTNERS)
PRIMARY COATING	GALVALUME PLUS™	G90 GALVANIZED / PREMIUM PAINT
MAX WARRANTY	50-YEAR (CORROSION)	40-YEAR (FINISH)
ASSEMBLY STYLE	DIY-FRIENDLY / BOLT-TOGETHER	PROFESSIONAL ERECTOR'S RECOMMENDED
CUSTOMIZATION	MODERATE / MODULAR	HIGH / ARCHITECTURAL
BEST APPLICATION	AGRICULTURE & STORAGE	INDUSTRIAL & COMMERCIAL

We don't settle for "standard". Our building skins are engineered to protect your assets for decades.

High-Tensile Steel: Sourced from ArcelorMittal Dofasco to ensure maximum structural yield.

The Arch Gauge Spectrum (Quonset Only): For our self-supporting Quonset systems, the steel is the structure. We offer specialized thicknesses ranging from 22 GA. down to ultra-heavy 15 GA. for high impact industrial and heavy-snow environments.

Cool Roof™ Technology: Reflective pigments in our coatings reduce solar heat absorption, lowering interior temperatures by up to 15°C.

SPECIALIZED KITS & SECTOR SOLUTIONS

VERSATILE DESIGNS FOR EVERY INDUSTRY

At Metal Pro, we don't just provide steel; we provide tailored environments. Whether you are looking for a DIY-ready backyard workshop or a complex industrial manufacturing plant, our building systems are engineered to fit your specific application.

Residential: Sleek Barndominiums and luxury garages.

Agricultural: Livestock-safe barns and column-free riding arenas.

Industrial: Cold-storage facilities and heavy-equipment workshops.

Commercial: Retail plazas and professional office buildings.

Infrastructure: Aircraft hangars and shipping container covers.

Ready-to-Assemble Specialty Kits Our kits arrive at your site precision cut, pre-drilled, and ready for assembly. By choosing a specialty kit, you reduce on-site waste and significantly lower your labor costs.

THE FINISHING TOUCHES

OUR COLOR PALETTE

Choose from our signature range of **High-Performance SMP Coatings**. Engineered to resist fading and chalking, these "Cool Roof" rated finishes keep your building vibrant and energy efficient for decades.

PRECISION-FIT ACCESSORIES

Enhance the functionality and comfort of your structure with factory-integrated components designed to fit the first time.

Walk-Doors & Windows: Heavy-duty, insulated steel entry systems and high-efficiency thermal windows.

Overhead Doors: From sleek residential sectional doors to massive industrial roll-ups.

Insulation Packages: High R-value fiberglass and reflective systems for total climate control.

Ventilation & Lighting: Ridge vents, louvers, and polycarbonate skylights for natural airflow and "daylighting".

CUSTOM TRIM & FLASHING Complete your project with custom contoured trim. Available in matching or contrasting colors, our trim provides a professional, weather-tight finish to every corner and eave

FEATURED PROJECTS

Across Canada, Metal Pro structures are the preferred choice for those who demand durability without compromising on design. Our portfolio spans across every sector, proving that with steel, the possibilities are limitless.

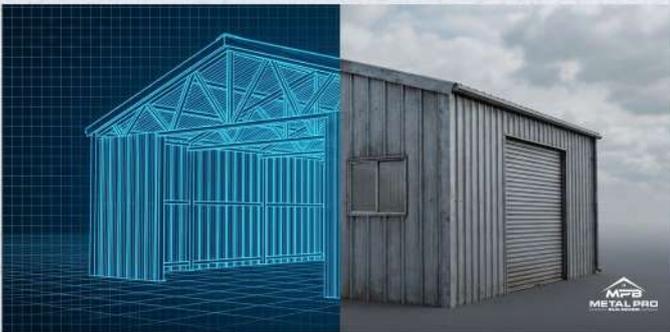

YOUR PROJECT TIMELINE SIMPLIFIED

Building with steel shouldn't be complicated. We have refined our process into five clear steps, ensuring that you are supported by our engineering and project management teams every step of the way.

Step 1: Consultation & 3D Visualization

We start by listening to your needs. Using advanced **3D Modeling Software**, we bring your vision to life. This is where we determine the ideal building system for your project and select the manufacturing partner **Pioneer, Robertson, Nucor, or Behlen** that best fits your structural and aesthetic requirements.

Step 2: Site-Specific Engineering

Once the design is finalized, our engineers calculate the precise wind, snow, and seismic loads for your specific postal code. You receive **Sealed Engineered Drawings** (Schedule A & B) tailored to the manufacturer's specific standards and required for your local building.

Step 3: Strategic Manufacturing

Your building is fabricated at the designated Tier-1 manufacturing facility best suited for your project. Using state-of-the-art technology, every component is precision-cut, pre-drilled, or roll-formed to your exact 3D specifications, ensuring world-class quality control.

YOUR PROJECT TIMELINE SIMPLIFIED

Step 4: Delivery & Logistics

We coordinate the delivery of your building kit directly to your job site from our partner facilities. Each component is clearly labeled and bundled, accompanied by a comprehensive **Assembly Manual** tailored specifically to your chosen building system.

Step 5: Assembly & Support

Whether you choose to **DIY** your build (common for our Arch systems) or hire a **Professional Contractor**, our bolt-together systems ensure a fast, seamless assembly process with zero on-site welding required for most structures.

SEE IT BEFORE YOU BUILD IT

Our 3D design process eliminates guess work. We can adjust eave heights, roof pitches, and lean to additions in real-time, providing you with a high-resolution rendering that serves as the "north star" for your entire project.

Why the Metal Pro Process Wins:

Precision Planning: 3D models ensure every door and window is exactly where you need it.

Reduced Waste: Factory-cut components mean zero scrap on your job site.

Expert Guidance: A dedicated project coordinator from initial render to final bolt.

From Foundation to Finish, We've Got You Covered.

Investing in a Metal Pro building is about more than just square footage, it's about peace of mind. Whether you're protecting your livelihood on the farm, expanding your industrial foot print, or finally building that dream workshop, we provide the strength, engineering, and support to make it a reality.

Why Choose Metal Pro Buildings Canada?

Canadian Owned & Operated: Designed for our climate, using our steel.

Authorized Pioneer Steel Dealer: Factory-direct quality and pricing.

Unmatched Durability: 50-year warranties on Galvalume® Plus technology.

Expert Support: A dedicated team to guide you through permits, design, and delivery.
